Fire Retardant Plants
from Domus Nursery

While no plant is completely fire resistant, some plants put up a good fight and are excellent for slowing a fire’s progress and helping to block embers. ‘Safer’ plant choice is something to now consider for people as they design and plant gardens around residences in fire prone areas. 

**Lomandra** longifolia **Nyalla** is one of these. Semi-compact blue/grey foliage great for mass plantings and grown as an understorey contrast plant.

Full sun to part shade 140mm Pots

**Dianella** Cassa Blue is a compact, clumping variety with rich blue foliage. It has a mass of blue/yellow fls in Spring.

Full sun to part shade 0.4mH x 0.33mW 140mm Pots

**Dodonaea** ‘Mr Green Sheen’ is an Australian native that forms an upright, evergreen shrub. It is a great choice for privacy and screens. It is a tough, fast growing shrub that tolerates coastal conditions and also dry conditions once established.

Full sun 80cm H 60cm W 175mm Pots

**Coprosma** Gold Fever has attractive foliage of large, glossy golden leaves with a green centre. You can be guaranteed of stunning foliage colour, any time of the year.

It’s easily pleased, requiring only a trim and feed once a year and being planted in a position with well drained soil.

Full sun to part shade 1m H x 1.5m W

Disclaimer-

There is information available about fire retardant plants but it is worth noting that no plant is completely non-flammable. Fire retardant plants will normally burn at a lesser rate than other plant varieties. Australian native plants use fire as a means of seed dispersal and propagation, so are well adapted to survive bush fires. Native plants, “ALL PLANTS, WHETHER THEY ARE EXOTIC OR AUSTRALIAN, WILL BURN WHEN SUBJECTED TO SUFFICIENT HEAT.” ANPSA
