

Australian Pollinator Week 10-17th Nov

Did you know that over 75% of the world's flowering plants rely on insect pollinators to reproduce? These pollinators include not only bees, but beetles, flies, butterflies, ants, wasps, moths & small animals like birds, bats and marsupials.

[Australian Pollinator Week](#) is a designated week when community, business and organisations can come together to raise awareness of the importance of pollinators and support their needs. Suggested here are some plants to encourage these important guests into your garden.

Callistemon Western Glory is a medium shrub to 3-4m. Spring and Summer boasts beautiful, large, mauve-red bottlebrush flowers. It is drought tolerant once established and tolerates full sun/part shade. A great choice for screens and hedges. 200mm Pot varieties available

Callistemon Western Glory

Dianella Kentlyn

Grasses also produce beautiful flowers that invite Australian native bees and specialist bees alike. Varieties like this Dianella Kentlyn are also very hardy once established. 140mm Pots varieties available

Scaevola Purple Fanfare and other varieties are wonderful for attracting Native bees to the garden. Their brightly coloured flowers are open invitations for insects one and all to come and gorge themselves til their hearts content. 130mm Pot varieties available

Scaevola Purple Fanfare

Prostanthera Purple Haze

Prostanthera's like the pictured P. Purple Haze are commonly pollinated by bees but also attract small birds. The aromatic 'Mint Bush' grows well in full sun to lightly shaded positions producing an abundance of flowers from throughout Spring. Once established they require only minimal water. 175mm Pot varieties available
