Tucker Bush Safety: Whether using our commercially grown Tucker Bush plants, or sourcing your own fruit & plant material from the wild, caution should be exercised. Fruit and any edible plant material may require specific preparation to be safely eaten. Please read our plant labels and consult the www.tuckerbush.com.au website for specific plant information.

TUCKER BUSH™

Edible Australian Tucker Bush

Atriplex nummularia
'Old Man Saltbush'
A hardy grower with attractive rounded grey-green foliage. Perform equally well in both gardens and containers is is also ideal for windbreaks and firebreaks. The foliage has a high salt content and can be used in cooking.

Enchylaena tomentosa
'Ruby Saltbush'
A hardy, low growing shrub with fleshy green leaves. Edible small berries ranging in colour from yellow to ruby red emerge year round. Responds well to regular pruning and is ideal for low hedges. Salt and drought tolerant.

Carpobrotus virescens 'Karkalla'
A hardy, native ground cover with thick, fleshy leaves and large pink/purple flowers with yellow centres.

Antidesma bunius 'Bignay'
A medium tree up to 8m with glossy green foliage and striking clusters of grape-like fruit that ripen throughout late summer. Enjoy the tangy berries fresh or made into jam.
