

DIANELLA

Dianella are tough Australian native grasses. They have blue flowers in Spring often followed by purple/blue berries. Plant in well drained, compost enriched soil. Avoid poor soils. Some watering is required to establish them as is the occasional water during long dry spells. They make excellent landscaping plants creating contrast in structural shapes. When choosing a Dianella consider foliage colour and how big they will grow to suit the site.

BLUE RIPPLE™ is a prunina hybrid which develops a short clump of broad, blue foliage. Tolerates frost and dry conditions.
Full sun to part shade.
H 35cm W 30cm

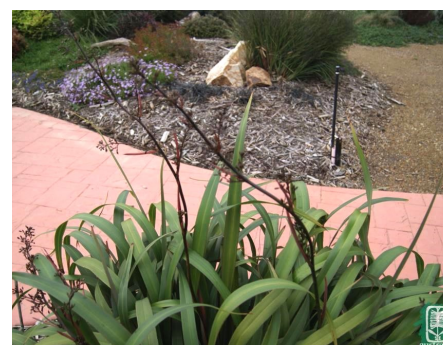

CASSA BLUE® DBB03 (D) is a caerulea cultivar with rich blue compact foliage and it is one of the longest flowering Dianellas available. Tolerates dry and cold conditions.
Full sun to part shade. H 50cm W 40cm

BLUE STREAM™ is a prunina cultivar. It is an attractive grass with clumps of broad, tall, light blue foliage.
Full sun to part shade.
H 70cm W 50cm

BREEZE® DCNC0 (D) is a caerulea cultivar that is tidier and has no above ground messy canes. Very fast establishing, filling in gaps and outcompeting weeds.
Full sun to part shade.
H 60-70cm W 60-70cm

CHERRY RED (D) is a tasmanica cultivar that features cherry red flower stems and deep green broad leaves. Frost tolerant. Suited to clay loam or humus-rich sand with moderate watering.
Full sun to part shade.
H 75cm W 75cm

DIANELLA

KENTLYN (D) is a revoluta cultivar bred for its upright habit and slim, mid-green leaves. It is tough and quick growing. Kentlyn is coastal and drought tolerant. Full sun to part shade. H 80cm W 80cm

LITTLE JESS™ DCMP01 (D) is a caerulea cultivar with short compact canes that don't fall over like the ones on the common form. Good cold tolerance. Full sun, moderate to heavy shade. H 40cm W 40cm

LITTLE REV™ DR5000 (D) is a revoluta cultivar with compact blue-grey foliage. Useful for residential and commercial applications. Frost tolerant. Full sun to moderate shade. H 30-40cm W 30-40cm

REVELATION® DRG04 (D) is a revoluta cultivar with blue-green strap-like leaves. Tolerates periodic wet feet, dry conditions and frost. For raised, flat and depressed areas. Full sun or part shade. H 50cm W 50cm

REVOLUTA is an original form of Dianella with dark green strap-like leaves. Good spreading, hardy variety that is well suited to covering larger areas. Drought and frost resistant. Full sun or part shade. H 100cm W 150 to 200cm

WYEENA® TAS300 (D) is a tasmanica cultivar that has been bred to have cleaner foliage than other variegated foliage varieties. It outcompetes weeds well and tolerates frost. Can be planted in most soil types from clay to free draining. Avoid poor soils. Full sun to part shade. H 80-90cm W 80-90cm
