Carex 'Feather Falls' (P) is a highly decorative ever-green sedge known for its striking cascading habit and resilient nature. Its long, crisp leaves feature a vivid variegated pattern of rich green with creamy white edges, maintaining a "fresh" look throughout the year.

Lomandra Seascape (P)

Compact and elegant, **Lomandra Seascape** (P) offers stunning blue-grey foliage that cascades beautifully. An ideal choice for mass planting or decorative containers, this rugged variety thrives with minimal water once established.

Carex 'Moon Falls' (P) is a vibrant, low-maintenance ornamental sedge featuring elegant green and white variegated foliage. Its compact, weeping habit stays neat year-round, making it a reliable choice for garden borders, decorative containers, and mass landscape plantings.

Cenchrus Nafray® (P)

Cenchrus 'Nafray' (P) is a resilient, clumping grass with fine, arching foliage. From summer through autumn, it produces elegant, feathery plumes. Highly drought-tolerant and adaptable 'Nafray' is an excellent choice for rock gardens and low-maintenance landscapes.

Carex Moon Falls (P)

GRASSES

Ficinia nodosa

Ficinia nodosa has striking upright, dark green stems and distinctive globular flowerheads that bloom throughout the year. It is a resilient choice is exceptionally hardy plant suited to any landscape thriving in diverse soil types and is particularly well-suited for pond margins or coastal environments withstand salt spray and wind.

Lomandra Verday is a versatile, low maintenance native grass featuring bright green foliage with a graceful arching habit that adds year round elegance. In spring and autumn it produces fragrant yellow flower spikes. Verday is exceptionally drought and frost tolerant adapting to most soil types.

Lomandra Verday (D)

Festuca glauca

Festuca glauca (Blue Fescue) A tidy, dome-shaped grass featuring distinctive blue-green foliage up to 15cm. To create a bold colour statement, plant en masse in full sun. This hardy, drought-tolerant variety is ideal for borders, rockeries, and container displays.

Lomandra 'Lime Tuff' is a resilient, low-maintenance grass known for its compact habit and vibrant lime-green blades. It produces fragrant yellow flower spikes in summer and, once established, requires very little water. This versatile variety is an ideal choice for coastal gardens, mass plantings, or as an effective understorey filler.
