

Dense Fence™

Viburnum odoratissimum 'VOC1' (D)

NEW

HARDY EXOTIC RANGE

An improved Sweet Viburnum with red new growth and white fragrant flowers in spring.

- Its finer leaves, higher density, shorter internodes and reddish new growth is what sets Dense Fence™ Viburnum apart from the common form.
- Will form a screening hedge quickly.
- Common Viburnum grows to about 5 metres, requiring more pruning. Although the Dense Fence™ plant would grow to 3.5 metres if left unpruned, this naturally more compact plant requires less pruning to keep it tidy.
- Its natural height and ability to grow into a screen relatively quickly makes it perfect for heights of 1.8 metres to 2.5 metres. Dense Fence™ Viburnum will form a 2 metre screen in 14 months if it's planted in 200mm pots and fertilised correctly.
- Tolerates moderate to heavy cold. However, it has coped better with -6° celsius compared to the common form in tests, probably due to its finer leaf. It will also tolerate light frost once established.

Description	Dense screen; subtle red new growth
Density	1-2 plants per m ² 1-2 per linear metre
Height & Width	3.5m x 2m
Flowering	White flowers in spring
Best Planting Time	Spring and autumn
Uses	Screen, hedge, small feature tree & patio pot plant
Position	Full sun to part shade; drought & cold tolerant
Soil Type	Most soil types, prefers well drained soil
Care	Slow release fertilise in early spring; prune as required; see website for details
