

Australian Pollinator Week 20-27th Nov

Did you know that over 75% of the world's flowering plants rely on insect pollinators to reproduce? These pollinators include not only bees, but beetles, flies, butterflies, ants, wasps, moths & small animals like birds, bats and marsupials.

[Australian Pollinator Week](#) is a designated week when community, business and organisations can come together to raise awareness of the importance of pollinators and support their needs. Suggested here are some plants to encourage these important guests into your garden.

Hypocalymma Coconut Ice is a small upright shrub to 80cm. Winter and Spring sees attractive pink/white flowers that remind you of the Coconut Ice Grandma use to make. It is drought tolerant once established and tolerates full sun/part shade. 140mm Pot varieties available

Hypocalymma Coconut Ice

Hebe Sunset Boulevard

It's not just natives that attract pollinators, plants like Hebe Sunset Boulevard produce beautiful flowers that invite Australian native bees and specialist bees alike. 140mm Pots varieties available

Scaevola Purple Fanfare and other varieties are wonderful for attracting Native bees to the garden. Their brightly coloured flowers are open invitations for insects one and all to come and gorge themselves til their hearts content. 140mm Pot varieties available

Scaevola Purple Fanfare

Correa Canberra Bells

Correa's like the pictured C. Canberra Bells(♾) are commonly pollinated by bees but also attract small birds. Correa's grow well in full sun to partly shaded positions producing an abundance of flowers from Autumn to Spring. Once established they require only minimal water. 140mm Pot varieties available
