Eucalyptus caesia 'Silver Princess'

Weeping white-coated branches carry a profusion of flowers in Winter and Spring. The juvenile leaves are rounded with mature leaves, long and slender. It has an open habit therefore unsuitable as a dense shade tree.

Fraxinus griffithii

Eucalyptus caesia 'Silver Princess'

Fraxinus griffithii 'Flowering Ash'

A fast growing, small tree to 7m. White flowers in spring are followed by decorative, large seed clusters. A great shade tree for parks and large gardens.

Talipariti (Hibiscus) tiliaceum 'Rubrum'

The Cottonwood is a spreading tree to 6m. Ideal as a windbreak/hedge it has red heart shaped leaves and large yellow tropical flowers in spring to summer. Performs best in full sun.

Talipariti tiliaceum 'Rubrum'

TREES

Eucalyptus erythrocorys

Tipuana tipu

Melaleuca linariifolia

Eucalyptus erythrocorys **'Red Cap Gum'**

A spectacular flowering gum with flowers from February to April. It has generally smooth bark with the occasional darker, rough patch. A popular street tree.

Tipuana tipu 'Pride of Bolivia'

A fast growing, semi-evergreen tree with compound leaflets. Brilliant bright yellow flowers appear in late summer. Prune while young to encourage good structure.

Eucalyptus forrestiana 'Fuchsia Gum'

A native small tree to 7m with ornamental flowers in summer. A popular choice for parks, roadside plantings and windbreaks. Also useful to control wind erosion.

Eucalyptus forrestiana

Agonis flexuosa

Melaleuca linariifolia 'Snow in Summer'

A bushy tree to 10m with a decorative, paperbark trunk. Masses of creamy-white flowers look spectacular in summer. A fast growing tree ideal for screens & windbreaks.

Agonis flexuosa 'Willow Peppermint'

An Australian native to 12m. It has an attractive weeping habit and the leaves have a faint peppermint aroma when crushed. White flowers in spring.
